It is used for 100% drying of clothes after wash & spin dry...

# TRANS-O-SONIC

ULTRASONIC DISINTEGRATORS

Ultrasonic Disintegrators are specially designed for pharmaceutical industry, chemical labs and various research institutes. They are widely used for:

- Emulsification of immiscible liquids
- Degassing and De-aerating of Liquids
- Formulations
- Particle Dispersion/Disintegration (In small volumes batches of less than 250 ml)

# TRANS-O-SONIC

## ULTRASONIC CLEANERS FOR LABORATORIES FOR CLEANING INFECTIOUS BOTTLES

These ultrasonic cleaners are mostly used in laboratories where samples of infectious blood, urine etc are collected for testing purpose.

These bottles are re-used for which a thorough cleaning process is required.

This multi-stage ultrasonic cleaning system completely minimizes human intervention thereby protecting them from any hazardous and life-threatening diseases.

Spray nozzles are provided at strategic locations so that high jet sprays of water/cleaning media gets sprayed directly inside the bottles.

Effective ultrasonic sonication helps in complete cleaning of the bottles making them fit to be re-used.

A 360 degree rotating mechanism is provided to remove the contaminated media from the bottles.
