EMI SOLUTIONS

EMI Solutions Pvt. Ltd. (EMIS)

EMI / EMC Power Line Filters, EMP Protection & Suppression Solutions

DEALER & SUPPLIER

ENGINEERING OVERVIEW & TECHNOLOGY HIGHLIGHTS

EMI Solutions Pvt. Ltd. (EMIS) is a premier Indian manufacturer and solution provider for Electromagnetic Interference (EMI) and Electromagnetic Compatibility (EMC) compliance. From single and three-phase power line noise suppression filters to high-performance military-grade EMP chamber filters, feedthrough capacitors, and IEC power entry modules, EMIS delivers total noise suppression and electromagnetic immunity across critical industrial, medical, and defense systems.

- High attenuation across broad frequency spectrum (10 kHz to 30 MHz conducted & high GHz radiated)
- Comprehensive Single Phase (1A to 100A) and Three Phase (up to 1200A) line filters with low earth leakage
- Power Feedthrough capacitors, cylindrical suppression filters, and industrial surge protection devices (SPD)
- Chamber filters engineered for HEMP (High-Altitude Electromagnetic Pulse) & Tempest shielded enclosures
- Panel and chassis-mount IEC inlet power entry filters with integrated fuse and DPST switch options

EMI & EMC POWER LINE FILTERS

Single Phase EMI Power Line Filters

Single Phase

Compact chassis and PCB-mount RFI power line noise suppression filters designed for single-phase equipment, automation controllers, and SMPS power supplies.

• Current: 1A to 100A • Voltage: 110V / 250V AC 50/60Hz • Low leakage current (medical versions available) • High differential & common mode attenuation

Three Phase EMI Filters (Delta & Wye)

Three Phase

Heavy-duty three-phase (with or without neutral) RFI noise filters engineered specifically for Variable Frequency Drives (VFDs), inverters, servo systems, and CNC machinery.

• Current: 5A to 1200A • Voltage: 440V / 520V AC • Mitigates motor drive harmonics & EMI feedback • Finger-safe touch-proof terminal blocks

Chamber Filters with EMP Protection

MIL-STD HEMP

Severe-duty shielded room, test facility, and defense installation filters offering high-energy surge handling and multi-gigahertz attenuation against HEMP and EMP threats.

• Attenuation: >100 dB from 14 kHz to 10 GHz • MIL-STD-188-125 compliant • High surge current withstand capacity • Robust welded enclosure with RF gasket

FEEDTHROUGH, INLETS & POWER SUPPRESSION COMPONENTS

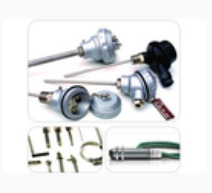

Power Feedthrough Capacitors & Filters

Feedthrough

Threaded cylindrical and solder-in feedthrough capacitors designed for shielded cabinets, telecommunication basestations, and high-frequency power feeds.

• Capacitance: 10 pF to 4.7 µF • Operating Voltage: Up to 1000V DC / 440V AC • Very high self-resonance frequency • Hermetically sealed brass/nickel-plated body

IEC Inlet Filter Modules

IEC Inlet

Chassis-mount IEC 320 C14 & C20 power entry modules with integrated EMI noise filter, optional fuse holder, and illuminated rocker power switch.

• Rated Current: 1A to 15A at 250V AC • Snap-in and screw-mount options • General purpose and low-leakage medical Grade M options • UL / CE / VDE approvals

Power Surge Protection Devices (SPD) & EMC Components

Surge Protection

Specialized transient voltage surge suppressors, cylindrical suppression filter networks, spark quenchers, and EMC chokes for industrial equipment protection.

• High discharge surge withstand (8/20 µs) • Fast nanosecond response time • Transient overvoltage clamping • DIN rail & chassis mount

OFFICIAL COMMERCIAL QUOTATION & TECHNICAL SUPPORT
