CD AUTOMATION

CD Automation S.r.l. (Italy)

Heavy-Duty Thyristor Power Controllers & SSR Units

DEALER & SUPPLIER

ENGINEERING OVERVIEW & TECHNOLOGY HIGHLIGHTS

CD Automation is an Italian specialist manufacturer of industrial Thyristor Power Controllers, Solid State Relays with heat sinks, and Multidrive units capable of switching and modulating electrical power from small lab heaters up to 2000A industrial furnaces.

- REVO Series thyristors with advanced microprocessors and OLED diagnostics display
- True RMS load voltage, current, and power measurement
- Native industrial fieldbus: Modbus RTU, Profinet, Profibus, EtherNet/IP, Modbus TCP
- Configurable firing modes: Zero Crossing, Burst Firing, Single Cycle, and Phase Angle
- Total and partial load failure alarm (HB heater breakdown diagnostics)

THYRISTOR POWER CONTROLLERS & POWER UNITS

REVO Series Thyristor Power Controllers

REVO Series

State-of-the-art intelligent thyristor units (REVO S, REVO M, REVO CL) with digital calibration and multi-zone support.

• Single, 2-phase, and 3-phase models • Current: 10A to 800A+ • Voltage up to 690 VAC • Phase angle and burst firing

Heat Sink SSR Assemblies

Integrated Heat Sink

Complete solid-state switching blocks with pre-assembled factory-rated heat sinks and semiconductor fuses.

• Single and multi-phase • Integrated thermal cutout switch • DIN rail or backplate mounting

DM Series Multidrive Power Controllers

Compact modular multi-channel power controllers managing multiple heating zones from a single communication node.

• Independent zone control • Power sharing algorithms to reduce peak factory demand • Modbus RS485 communication

Multidrive 1-Phase / 2-Phase / 3-Phase Units

Modular power controllers engineered for complex heating elements like silicon carbide (SiC), molybdenum, and transformers.

• Current limit and power limit (V^2, I^2, P) • Soft-start and current ramp • Diagnostic feedback to SCADA

OFFICIAL COMMERCIAL QUOTATION & TECHNICAL SUPPORT
