OFFICIAL BRAND CATALOGUE • AUTOMATION

EMERSON

Emerson Electric Co.

PACSystems, HMIs, Programmable Controllers & HVAC Automation

DEALER & SUPPLIER

ENGINEERING OVERVIEW & TECHNOLOGY HIGHLIGHTS

Emerson provides world-leading industrial automation solutions, PACSystems programmable automation controllers, edge devices, and dedicated HVAC & refrigeration control electronics (Copeland controls) designed for maximum reliability and energy optimization.

- PACSystems RX3i high-performance controller with dual-redundancy for zero unplanned downtime
- QuickPanel+ multifunctional operator touchscreen HMI with built-in PLC runtime
- Built-in PROFINET, Modbus TCP, OPC-UA, and IIoT analytics capabilities
- RSTi-EP modular distributed slice I/O system with compact high-density footprint
- Dedicated Copeland & Emerson HVAC/R rack controllers and Electronic Expansion Valve (EEV) drivers

PAC SYSTEMS, PLCS & INDUSTRIAL HMIS

PACSystems RX3i Controllers

PACSystems RX3i

High-speed programmable automation controller with multi-core processing, gigabit backplane, and hot-standby redundancy.

• Hot-swap modular I/O • High-speed PROFINET ring redundancy (MRP) • Embedded cyber security

RSTi-EP Slice I/O & Micro PLCs

Ultra-compact distributed I/O slices (11.5mm width) with integrated test points and pluggable spring terminals.

• Up to 64 modules per network node • PROFINET, EtherNet/IP, Modbus TCP adapters

QuickPanel+ Touchscreen Operator Interfaces

All-in-one HMI combining graphical visualization, PLC control logic, and data historian on a multi-touch screen.

• Screen sizes: 6", 7", 10", 12", 15" • Multi-touch projected capacitive display • Built-in VNC remote server

HVAC & INDUSTRIAL REFRIGERATION AUTOMATION

Copeland / Emerson Facility & Rack Controllers

HVAC & Cold Chain

Dedicated supermarket refrigeration, chiller plant, and cold chain controllers (E2 / E3 facility management).

• Multi-compressor sequencing • Floating suction/condensing optimization • Refrigerant leak detection integration

Chiller & AHU Dedicated Controllers

Microprocessor-based control boards programmed for chillers, air handling units (AHU), and variable air volume (VAV).

• Precision PID temperature/humidity staging • BACnet MS/TP and IP communication

Electronic Expansion Valve (EEV) Drivers

Stepper motor driver modules for electronic expansion valves ensuring optimal superheat control and energy savings.

• Ultra-fast superheat response **• Battery backup safety valve closure**

OFFICIAL COMMERCIAL QUOTATION & TECHNICAL SUPPORT

To request an instant pricing quotation, OEM warranty validation, or technical submittals for this brand:
