ERI

Electronic Relays India Pvt. Ltd.

Solid State Relays & Advanced I/O Switching Modules

DEALER & SUPPLIER

ENGINEERING OVERVIEW & TECHNOLOGY HIGHLIGHTS

Electronic Relays India (ERI) is a pioneer in the manufacturing of Solid State Relays (SSR) and Input/Output Modules. Built to international benchmarks, ERI relays ensure spark-free, silent, and ultra-high-speed solid-state switching with high MTBF.

- UL Approved, CE Certified, RoHS Compliant & ISO 9001 certified
- Zero cross-over switching and random turn-on options
- Rugged heat sink mountable & DIN-rail ready designs
- Optical isolation up to 4000Vrms between input and load
- Built-in RC snubber and high transient voltage suppression

SOLID STATE RELAYS (SSR)

Single Phase Solid State Relays

02A ~ 125A

02 to 07 Amps (PCB Mount) & 10 to 125 Amps (Panel Mount) for resistive and inductive loads.

• Load: 24-480 VAC • Control: 3-32 VDC / 90-280 VAC • Opto-isolated: 4000 Vrms • Zero Voltage Turn-on

Three Phase Solid State Relays

10A ~ 125A

Heavy-duty 3-pole switching for balanced 3-phase industrial heaters, ovens, and furnaces.

• Load: 24-530 VAC 3-Phase • Current: 25A, 40A, 60A, 80A, 100A, 125A • Integrated LED status indicator

Phase Control SSR

Proportional phase angle control relays for precise thermal regulation and lamp dimming.

• Input: 4-20mA, 0-10VDC or Potentiometer • Smooth power variation 0-100%

Three Phase Motor Reversing SSR

Solid-state forward/reverse direction switching for 3-phase AC induction motors with interlock delay.

• Built-in reverse interlocking circuit • Ultra-fast response time

DIN Ready SSR & ECO SSR

Compact modular relays with integrated heat sinks designed for quick 35mm DIN-rail snapping.

• DIN Rail 35mm clip • Integrated finger-safe terminal covers • Optimized thermal dissipation

DC-DC Solid State Relays & SCP SSR

MOSFET and IGBT based DC switching with short circuit protection for battery and DC equipment.

• DC Output: up to 200 VDC • Fast microsecond switching speed

INPUT / OUTPUT (I/O) MODULES & INTERFACE CARDS

AC Output Modules (3 - 5 Amp)

Triac-based isolated output drivers for contactors, solenoids, valves, and motor starters.

• Load: 12-280 VAC • Logic: 5V, 12V, 24V DC • Optical isolation 4KV

DC Output Modules (3 - 5 Amp)

Transistor & MOSFET DC switching modules for PLCs and digital control systems.

• Load: 3-60 VDC • Logic: 5V, 12V, 24V DC

AC Input Modules (110 / 220 VAC)

Safe conditioning and isolation of 110V/220V field voltages to digital micro-controller logic levels.

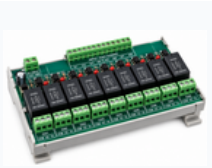

• Field Input: 90-280 VAC • Logic Output: 5V/15V/24V DC • Filter delay suppression

DC Input Modules (48 / 110 / 220 VDC)

Wide-range DC sense modules for high-voltage DC monitoring in power substations and panels.

• Field Input: 48V, 110V, 220 VDC • Optocoupler isolation

Multi-Channel I/O Relay Interface Cards

1 to 32 Channels

Modular DIN-rail mounting relay carrier boards available in 1, 2, 4, 8, 16, and 32 channels with LED status.

• 1 / 2 / 4 / 8 / 16 / 32 Channels • Pluggable relays • Common positive/negative jumpers • Freewheeling diode protection

OFFICIAL COMMERCIAL QUOTATION & TECHNICAL SUPPORT
