GEFRAN

Gefran S.p.A. (Italy / India)

Sensors, LVDT Displacement Transducers, Controllers & Drives

DEALER & SUPPLIER

ENGINEERING OVERVIEW & TECHNOLOGY HIGHLIGHTS

Gefran is a premier European manufacturer specializing in industrial sensors, linear displacement transducers (LVDT / magnetostrictive), melt pressure transmitters for polymer processing, digital process controllers, and variable frequency drives.

- Industry-standard Melt Pressure Transducers for plastic extrusion up to 538°C
- Microprocessor controllers (Series 600, 800, 1200, 1600) with custom graphic displays
- Extreme measurement repeatability and durability in aggressive industrial environments
- High-precision LVDT and non-contact magnetostrictive linear transducers (Hyperwave technology)
- ADV200 high-performance vector inverters with closed-loop field-oriented control

SENSORS & LINEAR DISPLACEMENT TRANSDUCERS

Melt Pressure Transducers & Transmitters

Melt Pressure

Mercury-filled, FDA-compliant Oil-filled, and Sodium-Potassium (NaK) impact fluid-free melt pressure sensors for extruders.

• Pressure range: 0-35 bar up to 0-2000 bar • Temp: up to 400°C / 538°C • Output: mV/V, 4-20mA, 0-10V, HART, CANopen, IO-Link

LVDT & Linear Displacement Transducers

LVDT & Linear

Potentiometric position transducers (LT, PK, PC series) and non-contact magnetostrictive sensors (WPG, MK4).

• Strokes from 10mm up to 4000mm • Resolution down to 0.005mm • Rod and profile types • IP67 protection

Temperature & Pressure Transducers

Industrial thermocouples, RTD Pt100 probes, and piezoresistive pressure sensors for hydraulic and pneumatic presses.

• Gauge & absolute pressure • High shock & vibration resistance

CONTROLLERS, INDICATORS & INDUSTRIAL DRIVES

Gefran Microprocessor Controllers (600, 800, 1200, 1600)

Series 600/800

Digital PID controllers with customizable bar-graphs, mathematical functions, timer alarms, and valve motor control.

• Dual 4-digit LED or LCD display • Universal configurable input • RS485 Modbus RTU communication

Gefran Inverters & Variable Frequency Drives (ADV200)

Field-oriented vector inverters engineered for extruders, cranes, metal processing, and high-speed precision spindles.

• Power range: 0.75kW to 1.65MW • Sensorless and closed loop encoder feedback • Integrated safe torque off (STO)

OFFICIAL COMMERCIAL QUOTATION & TECHNICAL SUPPORT
