CLEAN GRAD SLOVENIA

Cleangrad d.o.o. (Slovenia)

GMP Cleanroom Partition Walls, Ceilings & Dynamic/Static Pass Boxes

DEALER & SUPPLIER

ENGINEERING OVERVIEW & TECHNOLOGY HIGHLIGHTS

Cleangrad (Slovenia) is an international European manufacturer of bespoke cleanroom systems. Engineered for the strictest GMP and HSE pharmaceutical standards, Cleangrad provides flush cleanroom wall partitions, walkable ceilings, dynamic pass boxes, and airtight doors.

- Fully compliant with GMP Class A, B, C, D standards and ISO 14644 cleanroom classes
- Dynamic Pass Boxes with built-in HEPA filtration, laminar vertical airflow (0.45 m/s), and UV sterilization
- GMP fire-rated flush double-glazed safety glass windows with integrated desiccants
- Sustainable flush partition wall systems with silicone-free flush jointing and chemical resistance
- Airtight cleanroom doors featuring inflatable seals or magnetic gasket sealing

CLEANROOM WALL PARTITIONS & CEILING SYSTEMS

Modular Cleanroom Partition Walls

GMP Partition Walls

Flush wall systems constructed from powder-coated galvanized steel, stainless steel, or compact laminate with PIR/mineral wool insulation.

• Panel thickness: 60mm / 80mm • Seamless completely flush surface • Resistant to aggressive disinfectant agents (H2O2 vapor) • Integrated flush electrical & conduit chases

Walkable Flush Cleanroom Ceilings

Heavy-duty walkable false ceiling systems engineered to support maintenance personnel while housing HEPA filters and LED teardrop luminaires.

• Load capacity up to 150 kg/m² • Flush integrated lighting and fan filter units (FFU) • Seamless ceiling-to-wall coving

GMP Fire-Rated Flush Glass Windows

Double-glazed flush inspection view panels mounted perfectly flush on both sides of partition walls.

• Tempered safety glass • Integrated silica desiccant to prevent condensation • Fire rating up to EI 60 minutes

PASS BOXES, AIR SHOWERS & PHARMA DOORS

Dynamic Pass Boxes (Active Cleanroom Transfer)

Dynamic Pass Boxes

Sterile transfer chambers equipped with integrated motor blower, H14 HEPA filtration, UV-C germicidal lamp, and electromagnetic door interlocks.

• Laminar airflow velocity: 0.45 m/s ± 20% • Differential pressure Magnehelic gauge • AISI 304 / 316 stainless steel interior • Audio-visual door status indicators

Static Pass Boxes

Mechanical or electromagnetic interlocking transfer hatches for contamination-free transfer between rooms of equal classification.

• Interlocking prevents both doors opening simultaneously • Easy-to-clean coved interior corners • Viewing flush safety glass

Cleanroom Doors with Inflatable / Magnetic Seals

Flush cleanroom doors with pneumatic inflatable active gaskets for hermetic containment in bio-hazard and sterile BSL suites.

• Inflatable seal automatically inflates on closure • Touchless wave-to-open sensors • Heavy-duty stainless steel fittings

Cleanroom Air Showers & Mist Decontamination Units

High-velocity filtered air jets to strip surface particulate from personnel before entering critical GMP Grade B/A zones.

• Nozzle air speed: 20-25 m/s • Microprocessor programmed shower cycles • Emergency panic egress buttons
